About me

I am a **Cybersecurity and Embedded Systems Engineering** student at ENSA Tétouan, with skills in network security, penetration testing, and programming (Python, Java, VHDL, Bash, PowerShell, Assembly). Currently holding the eCPPTv3 certification from INE, I've completed the eJPT training, Google Cybersecurity Certificate, and Java/Python courses. My knowledge spans penetration testing (network, web applications, Active Directory), exploit development, and embedded systems, demonstrated through projects like LetsShare, a secure file transfer application. I work with industry-standard tools including Burp Suite, Metasploit, Nmap, Wireshark, BloodHound, and Impacket. With a Baccalaureate in Physical Sciences (Mention Très Bien) and active participation in CTF competitions like North Hacking Day, I bring strong problem-solving, adaptability, and leadership skills to develop impactful and secure technology solutions

Education

Cybersecurity and Embedded Systems Engineer, École Nationale des Sciences Appliquées (ENSA), Tétouan, Morocco — Sept 2022 – July 2027 (In Progress)

Baccalaureate in Physical Sciences, Mention Très Bien, Lycée Qualifiant Abi Rabie Sebti, Fnideq, Morocco — Sept 2019 – July 2022

Certifications & Courses

eCPPT (Certified Professional Penetration Tester), INE — October 2025

eJPT (Junior Penetration Tester) Full training, INE — July 2025

Google Cybersecurity Professional Certificate (8 Courses), Coursera — March 2025

Java Fundamentals (3 Courses), DataCamp — January 2025

Python for Everybody (5 Courses), Coursera — April 2024

Skills

Programming Languages: Python, Java, VHDL, Bash, PowerShell, Shellcoding, Assembly (AVR & DSP)

Network & Cybersecurity: Information Gathering, Network Pentesting, Web App Pentesting, Active Directory Pentesting, Exploit Development.

Technical Tools: Burp Suite, Metasploit, Nmap, Wireshark, BloodHound, Impacket

Soft Skills: Autonomy & Self-Motivation, Problem-Solving & Critical Thinking, Leadership & Team Management, Adaptability & Continuous Learning, Communication & Collaboration

Projects

Penetration Testing Practice | HackTheBox Labs September - October 2025

- Hands-on penetration testing labs focusing on Active Directory exploitation, Windows privilege escalation, and network enumeration across multiple enterprise environments.
- Utilized offensive security tools: CrackMapExec, Kerbrute, Mimikatz, BloodHound, Impacket, and PrintSpoofer for credential extraction and privilege escalation

LetsShare - File Transfer Application github.com/m-arjaz/letsshare

- Built a Java app for secure file transfers using TCP/IP sockets.
- Designed a client-server GUI with Java Swing (send, receive, history).
- Logged transfer details to logs.txt using file I/O.
- Added progress tracking, IP validation, and error handling.
- Managed firewall rules and optimized streaming with 32KB buffers.
- Tools & Technologies: Java, Java Swing, TCP/IP Sockets, Networking, File I/O

Experiences

Penetration Tester Intern, Deltaware Solution Pvt Ltd – Remote Nov 2025 – Present

- Remote penetration testing internship focusing on cybersecurity assessments and vulnerability analysis
- Applied industry-standard penetration testing methodologies to evaluate security posture of systems and applications
- Conducted security testing across network infrastructure, web applications, and system configurations
- Contributed to cybersecurity projects by identifying vulnerabilities and documenting findings with remediation recommendations

North Hacking Day - CTF Competition, ENSA Tétouan February 2025

- Participated in competitive Capture The Flag cybersecurity event organized by ENSA Tétouan
- Gained hands-on exposure to real-world security challenges across web exploitation, cryptography, and forensics categories
- Analyzed challenge methodologies and developed understanding of common vulnerability patterns
- Strengthened problem-solving approach and technical research skills in competitive environment

Basmat Al-Khair Group, Team Member, Amsa Charity Project April 2024

- Participated in infrastructure renovation project as part of charity initiative
- Collaborated with team of 10+ volunteers to achieve project objectives
- Managed logistics and coordinated tasks across multiple workstreams
